Chisum Bronco XL

Not Your Average Frame Machine

Back in 1969, Lavell Chisum crafted his very first machine.

Fast forward over 55 years later, we're thrilled to introduce the Chisum Bronco XL. Built on that legendary Chisum quality, this machine is a gamechanger in the world of collision repair. Whether it's unibody or full frame vehicles, Chisum's got you covered. Perfect for every vehicle going through the shop. Ideal for writing an estimate, disassembling a vehicle, or doing a supplement. Whether you're making a quick pull, changing a bumper, or handling a big repair on a unibody or full frame, the new Chisum Bronco XL is perfect.
